A dive into the BLUE

### RUBBER BOATS HIRE WITH SKIPPER

For whoever wants to enjoy the sea and find out each corner of the wonderful Eastern Coast, from the **Arbatax Gulf** to the **Orosei Gulf**, there is no better nautical means than a comfortable and functional rubber dinghy. Totally safe, with the maximum comfort and with no worry of steering the boat, Charter Sardina suggests a hire service with skipper. You will have a boat with a skilled and qualified skipper who will lead you wherever you like during the day. He will show you all the details of more than 40 Km of coast and, depending on weather conditions, will suggest you the best stops for a suitable route. You could arrange together with him the stops at the wonderful beaches, to be reached only by boat, or routes towards the discovery of sea caves, to be reached only by small boats, such as "La Grotta della Contessa" (the Countess Cave), absolutely not to be missed. You could choose between the part-time or full-time service and find out the pleasure of feeling a new emotion at every cove you get to. On request, your skipper could also fetch you from any beach where you are, in Orosei or Arbatax Gulfs, including Santa Maria Navarrese or Cala Gonone Harbours. In case of hire for more days and with different routes, discounts are possible according to the season. The rubber boat hire service with skipper is effective throughout the year (in the low season prior booking would be appreciated). The models at your disposal are the following:
